EXO-NAD

SKIN LONGEVITY PEELING

A BREAKTHROUGH **BIOHACKING**
PEEL FOR **SKIN REGENERATION**
AND CELLULAR **LONGEVITY**

EXO-NAD

IS A **NEXT-GENERATION** SKIN LONGEVITY PEEL,
INSPIRED BY **ADVANCED BIOPHARMACEUTICAL** RESEARCH

IT IS DESIGNED TO **REJUVENATE, RESTORE, AND ENHANCE SKIN VITALITY** THROUGH CUTTING-EDGE **EXOSOMAL TECHNOLOGY, EPITALON, GHK-CU, NAD+ AND OTHER BIOMIMETIC PEPTIDES.**

THE SCIENCE BEHIND **SKIN LONGEVITY**

BIOHACKING TECHNOLOGY

Cellular optimization through synthetic exosomes and NAD+ activation.

MULTI-LAYERED REJUVENATION

Optimized exfoliation, hydration, and long-term DNA protection.

ADVANCED PEPTIDES

Epitalon, GHK-Cu and growth factors for sustained skin regeneration.

KEY BENEFITS

- Protection of Telomeres
- Boosts **Cellular Longevity**
- Improves Cellular Energy Production
- Stimulates Collagen Production & DNA Repair
- Restores Skin Elasticity & Firmness
- Reduces Wrinkles & Hyperpigmentation

THE INNOVATIVE SYSTEM

THE 3-STEP SKIN LONGEVITY SYSTEM

- **BIPHASIC EXO-PEEL** | Dual-action exfoliation for deep cellular renewal.
- **PH NORMALIZER** | Buffered collagen & colloidal gold for post-peel repair.
- **LONGEVITY SERUM** | Synthetic exosomal infusion with NAD+, peptides & growth factors.

HOW IT WORKS

STEP 1 Intelligent Exfoliation: Biphasic peeling powered by Epitalon & Glycolic Complex.

STEP 2 Skin Barrier Recovery: Gold-infused pH Normalizer for instant repair.

STEP 3 Deep Cellular Regeneration: Longevity Serum stimulates skin rejuvenation at DNA level.

BREAKTHROUGH INGREDIENTS

- **EPITALON PEPTIDE** | Activates telomerase for DNA protection.
- **NAD+ INFUSION** | Boosts ATP energy & longevity.
- **GHK-CU PEPTIDE** | Enhances collagen synthesis & antioxidant defense.
- **BIOMIMETIC GROWTH FACTORS** | Support fibroblast function & deep tissue repair.
