YOUR WELLNESS. YOUR ROUTINE. YOUR WAY.

Three premium pen kits, created to complement modern wellness routines with convenience, clarity and confidence.

NAD+

L-GLUTATHIONE

CELLGEVITY

PRECISION WELLNESS AT A CELLULAR LEVEL

Find your WELLNESS MATCH

Choose the formula that best complements your goals. Every Nadura Wellness pen kit arrives as a complete, considered system for your prescribed routine.

NAD+
DAILY VITALITY
1000mg / 3ml

- Cellular energy support
- Focus and vitality
- Metabolic wellbeing

EXPLORE YOUR ROUTINE

L-Glutathione
ANTIOXIDANT SUPPORT
2 x 750mg / 3ml

- Antioxidant defence
- Skin radiance support
- Everyday resilience

EXPLORE YOUR ROUTINE

Cellgevity
COMPLETE FORMULA
NAD+ + L-Glutathione + B12

- Energy and vitality
- Antioxidant support
- All-in-one convenience

EXPLORE YOUR ROUTINE

Designed around real life

A premium refillable pen, individually packed needles, sterile wipes and straightforward instructions bring everything together in one elegant kit.

01 / PRODUCT GUIDE

NAD+

CELLULAR ENERGY + VITALITY

1000MG / 3ML

What it is

Nicotinamide adenine dinucleotide (NAD+) is a coenzyme found in every living cell. It helps transfer energy from the food we eat into reactions that cells can use, while also participating in signalling pathways connected with cellular maintenance.

How NAD+ works

Inside cells, NAD+ alternates between oxidised and reduced forms as it accepts and transfers electrons. This process supports the reactions that generate ATP - the usable energy currency of the cell. NAD+ is also used by enzymes involved in DNA maintenance and cellular signalling.

Potential wellness benefits

Energy pathways

Supports the cellular processes involved in converting nutrients into usable energy.

Metabolic function

Acts as an essential coenzyme in reactions involved in carbohydrate, fat and protein metabolism.

Cellular maintenance

Participates in enzyme pathways associated with DNA maintenance and healthy cellular function.

Everyday vitality

A focused option for customers whose professionally assessed plan prioritises energy and general vitality.

EVIDENCE-AWARE WELLNESS

Important perspective: NAD+ has essential biological roles, but the experience and clinical benefit of supplemental NAD+ can vary. It should not be presented as a treatment for ageing, fatigue or disease.

02 / PRODUCT GUIDE

L-Glutathione

ANTIOXIDANT DEFENCE + RADIANCE

2 X 750MG / 3ML

What it is

Glutathione is a naturally occurring antioxidant made from three amino acids: cysteine, glutamate and glycine. It is present throughout the body and forms an important part of the cells' own antioxidant and recycling systems.

How glutathione works

Glutathione can donate electrons to help neutralise reactive compounds. In doing so it changes from its reduced form (GSH) to an oxidised form (GSSG), which the body can recycle. It also supports enzyme systems involved in processing certain compounds in the liver.

Potential wellness benefits

Antioxidant network

Contributes to the body's natural defence against oxidative stress at a cellular level.

Recycling support

Works alongside enzymes that help regenerate antioxidant capacity within cells.

Healthy-looking skin

Often chosen in wellness settings where antioxidant support and skin radiance are priorities; outcomes vary.

Everyday resilience

A focused formula for customers seeking professionally guided antioxidant support.

EVIDENCE-AWARE WELLNESS

Important perspective: Glutathione is central to normal antioxidant biology, but individual responses to supplementation vary. Cosmetic or wellness outcomes are not guaranteed.

03 / PRODUCT GUIDE

Cellgevity

THREE-IN-ONE WELLNESS SUPPORT

750MG NAD+ + 600MG L-GLUTATHIONE + 2MG B12

What it is

Cellgevity brings together three complementary ingredients in one convenient formula: NAD+ for cellular energy pathways, L-Glutathione for antioxidant function, and vitamin B12 for normal red blood cell formation, neurological function and DNA synthesis.

nadura | wellness

Cellgevity
PEN KIT

Precision Wellness at a Cellular Level

How the combination works

The ingredients act in different biological systems rather than performing the same job. NAD+ participates in energy transfer, glutathione contributes to antioxidant defence, and B12 acts as a cofactor in specific metabolic reactions. The combination is designed for a broader, all-in-one wellness approach.

Potential wellness benefits

● Broader support

Combines cellular energy, antioxidant and nutritional roles in one considered formula.

● Convenient routine

One cartridge combines three ingredients for customers who prefer a streamlined plan.

● B12 function

Vitamin B12 supports normal red blood cell formation, neurological function and DNA synthesis.

● Professionally tailored

Suited to customers whose clinical assessment indicates a combined rather than single-ingredient approach.

EVIDENCE-AWARE WELLNESS

Important perspective: B12 is not proven to increase energy or performance in people who already have adequate B12 status. Suitability should be established by a qualified professional.

Three focused formulas.

ONE PREMIUM ROUTINE.

01 NAD+

1000mg / 3ml

NAD+ is a naturally occurring coenzyme involved in cellular energy production and metabolism. This focused formula is designed for those looking to support vitality, mental clarity and everyday performance as part of a professionally guided wellness plan.

CELLULAR ENERGY

FOCUS

VITALITY

02 L-Glutathione

2 x 750mg / 3ml

Glutathione is an antioxidant naturally produced by the body. This premium formula is chosen by customers seeking antioxidant support, protection from oxidative stress and a wellness-led approach to healthy-looking skin and everyday resilience.

ANTIOXIDANT SUPPORT

RADIANCE

RESILIENCE

03 Cellgevity

750mg NAD+ + 600mg L-Glutathione + 2mg B12

A complete three-in-one formula combining NAD+, L-Glutathione and vitamin B12. Cellgevity is designed to bring complementary energy, antioxidant and nutritional support together in one convenient monthly wellness routine.

ALL-IN-ONE

ENERGY

BALANCE

Everything you need.

READY FOR YOUR ROUTINE.

Inside your pen kit

- 1 x metal refillable pen
- Product solution cartridge(s)
- 20 x individually packed needles
- 20 x sterile wipes

Already have your pen?

Choose a one-month refill kit for your next professionally guided routine.

A simple next step

1

CONSULT

Speak to a qualified healthcare professional.

2

CHOOSE

Select the formula suited to your assessed needs.

3
